WEB : [www.integranetgroup.com.au](http://www.integranetgroup.com.au)

Integranet was founded in 2003 with the objective of becoming a leading provider of Management Consulting, Technical Architecture and ICT services renowned for integrity in business and a delivery capability second to none.

Depending on client requirements, we can deliver our services both remotely and on site. Our service offering ensures outcome based delivery through our mature processes and experienced, pro-active delivery and project management capabilities. Supported by an array of product reseller options our clients are ensured cost effective end-to-end solutions.

Integranet understands that clients have varied and different requirements and our service streams meet these challenges through:

- » Cost certainty - Remote Infrastructure Support
- » Low cost application access - Software As A Service (SAAS)
- » Flexibility and specialisation - On-site Consulting

Our Management team has in excess of 60 years of direct experience within the industry and are based locally. Our focus is to listen, implement and improve, ensuring our clients achieve their objectives.

Integranet's ongoing success is based on designing tailored, cost effective business solutions that can be achieved through the application of our skilled people, our delivery capability and our quality processes.

Integranet can deliver a wide range of scalable services bringing our enterprise level processes, procedures and service quality to any size organisation at a cost effective price point.

Our client service approach will ensure outcome based success through mature processes and experienced, pro-active delivery of services and project management capabilities.

Integranet strives to be seen by our clients as a respected ICT services provider through:

- » Integrity in business and the community;
- » The quality of our people; and
- » Our exceptional service delivery.
